COMPANY OVERVIEW

About Precise BPO Solution

Precise BPO Solution is an enterprise data-operations partner, purpose-built to run the structured, high-volume, accuracy-critical workflows that sit behind AI systems, digital platforms and back-office functions. We combine trained production teams, layered quality control and secure delivery infrastructure to operate as a dependable extension of our clients' own operations — not a detached vendor.

Company Timeline

- 2008**
Company Founded
 Precise BPO Solution established with a founding focus on structured data operations.
- 2011**
Data Entry Services Expand
 Multi-domain data-entry capability scaled to support cross-industry clients.
- 2014**
Document Processing Launch
 Dedicated document processing and conversion practice established.
- 2017**
Global Client Base
 Delivery footprint extended to serve enterprise clients across multiple regions.
- 2020**
AI Data Annotation
 Purpose-built annotation practice launched to serve AI & ML model training.
- 2023**
Enterprise Delivery Framework
 Formal QA, security and governance framework rolled out enterprise-wide.
- Today**
Sustained Growth
 500+ professionals delivering scalable, secure operations for global partners.

What Sets Our Delivery Apart

- 
500+ Professionals
 A trained, full-time delivery workforce operating across dedicated production floors.
- 
Dedicated Delivery Teams
 Ring-fenced teams assigned per client, per program, with named leadership.
- 
Secure Infrastructure
 Access-controlled systems, encrypted transfer layers and monitored environments.
- 
Scalable Operations
 Capacity that flexes from pilot volumes to enterprise-scale throughput.
- 
Long-Term Partnerships
 Multi-year engagements built on transparent reporting and accountability.
- 
Global Outsourcing Expertise
 Cross-border delivery experience spanning regulated and high-volume industries.

Built for Operational Accountability

Every engagement is assigned a named delivery owner, a documented SOP, and a quality baseline agreed before production begins — so scale never comes at the cost of visibility.

SERVICE PORTFOLIO

A Full-Stack Data Operations Portfolio

Two integrated practices — AI data labeling and structured data / document processing — delivered by the same governance model, so clients scale one relationship instead of managing many vendors.

AI Data Labeling & Annotation

16
CAPABILITIES

 Image Annotation	 Video Annotation
 Bounding Boxes	 Polygon Annotation
 Semantic Segmentation	 Instance Segmentation
 LiDAR Annotation	 Point Cloud Labeling
 Object Tracking	 OCR Annotation
 NLP Annotation	 Speech Annotation
 Medical Annotation	 Satellite Annotation
 Sports Analytics Tagging	 Generative AI Dataset Prep

Data Entry & Document Processing

15
CAPABILITIES

 Online Data Entry	 Offline Data Entry
 Document Processing	 Data Conversion
 OCR Cleanup	 Invoice Processing
 Forms Processing	 CRM Data Entry
 Catalog Processing	 Data Cleansing
 Data Enrichment	 Document Digitization
 eBook Conversion	 Legal Document Processing
 Medical Data Entry	

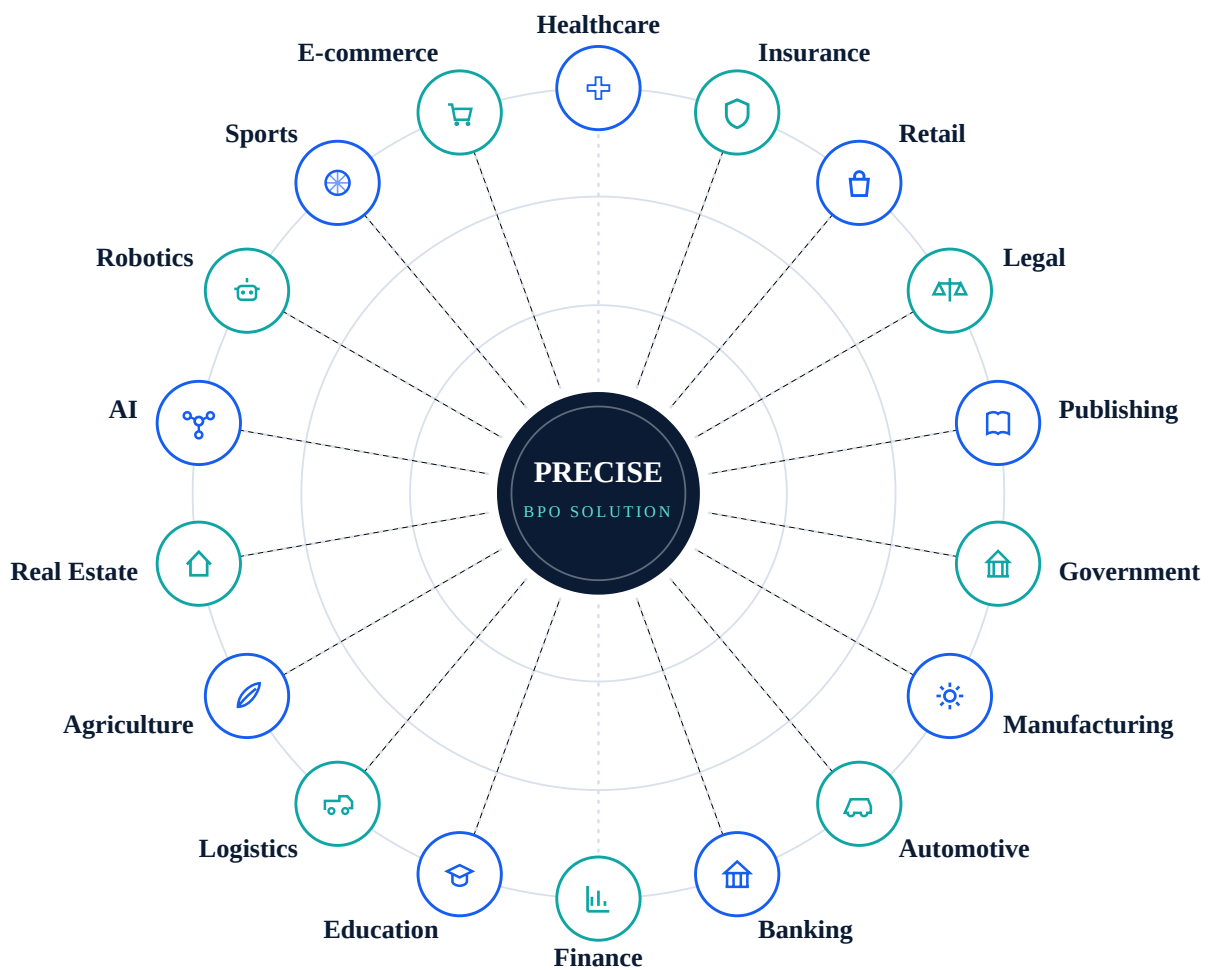

One delivery model, two disciplines. Every service above runs through the same production floor, QA hierarchy and security controls detailed on pages 05–07 — giving clients a single point of accountability across their entire data lifecycle.

— INDUSTRIES WE SERVE

Depth Across 18 Industry Verticals

Our teams are cross-trained on the compliance language, taxonomies and edge cases specific to each sector we serve — from clinical terminology to satellite imagery to regulatory document formats.

18

Verticals Actively Served

2

Core Practices, One Delivery Model

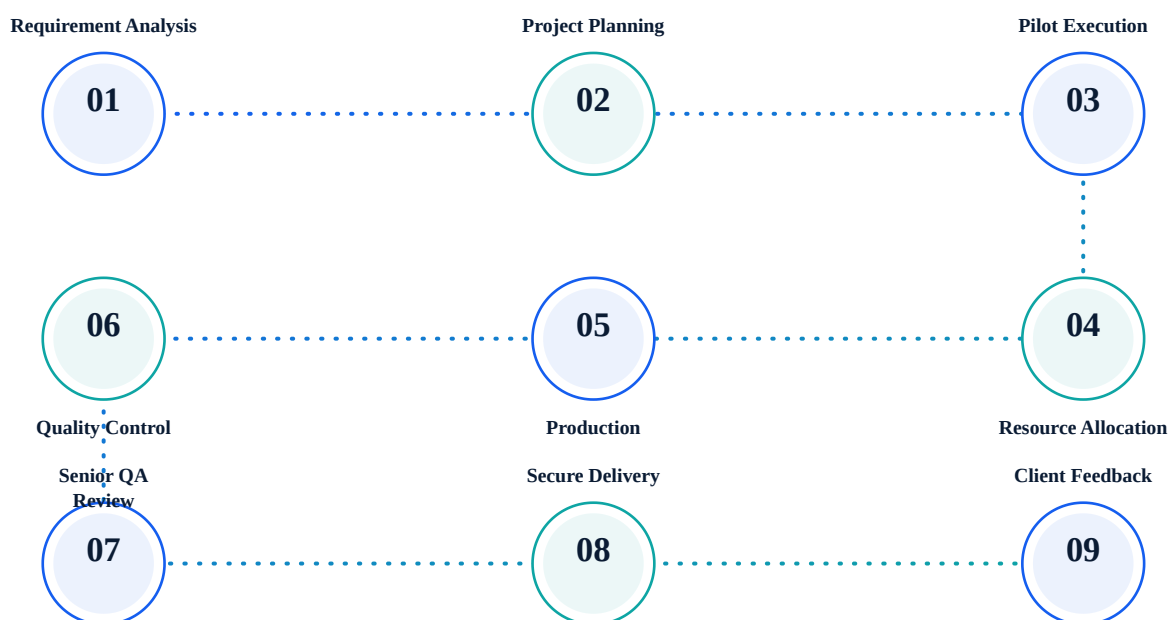

100%

Sector-Trained Teams

— DELIVERY MODEL

A Governed Nine-Stage Delivery Pathway

Every engagement — regardless of size — moves through the same disciplined pathway, from requirement analysis through to closed-loop client feedback.

100%

Engagements Piloted Before Scale-Up

3-Tier

Quality Checkpoints Per Stage

Named

Delivery Owner Per Program

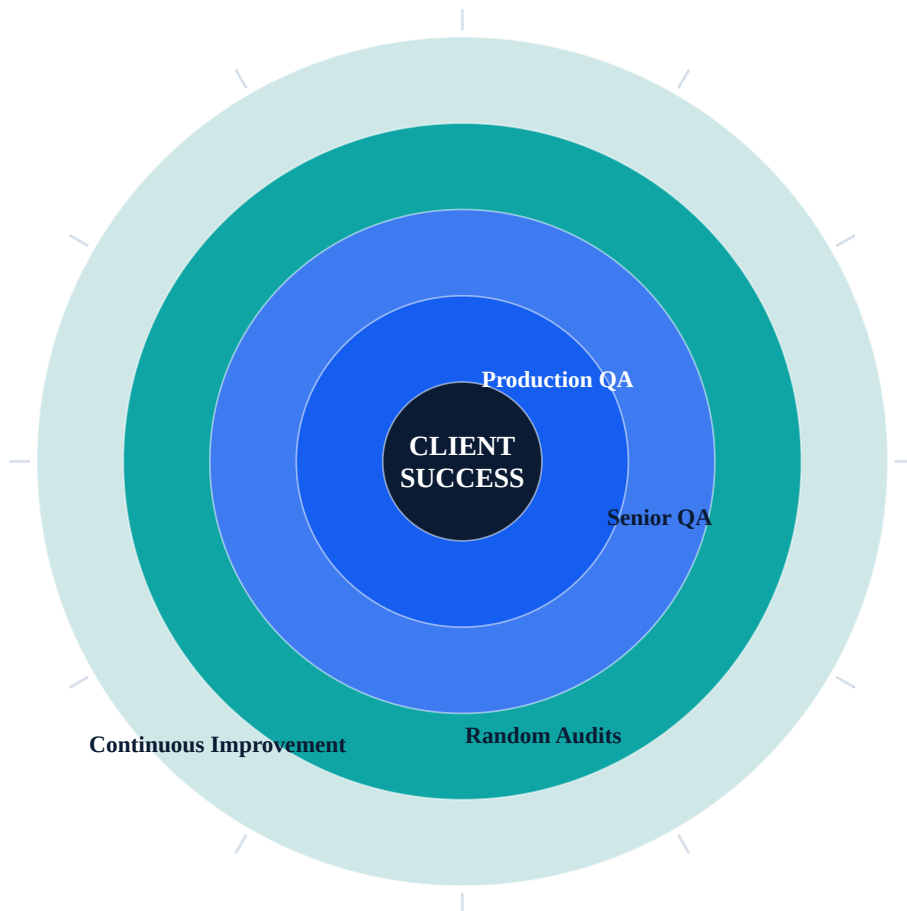

Closed-Loop

Feedback Into Next Cycle

— QUALITY MANAGEMENT

Quality Is Layered, Not Assumed

Accuracy is engineered through five concentric layers of review — each one independent of the layer inside it — so errors are caught before they ever reach a client deliverable.

Client Success (Center)

The innermost commitment — every layer outside exists to protect this outcome.

Production QA

First-line review performed by the delivery team on every completed batch.

Senior QA

Independent senior reviewers sample and validate against agreed accuracy thresholds.

Random Audits

Unscheduled audits across live projects to catch drift before it compounds.

Continuous Improvement

Findings feed back into SOPs, training and tooling — the outer ring closes the loop.

99%+

Accuracy Goal, Every Production Batch

Dedicated

QA Teams Independent of Production

Corrective Action Protocols

— SECURITY & COMPLIANCE

Security Engineered Into Every Layer

Client data is treated as a regulated asset from intake to disposal — governed by access control, encryption and audit at every stage of the workflow.

GOVERNANCE FRAMEWORK

**Access-Controlled. Encrypted.
Continuously Audited.**

**GDPR-Compliant Workflows**

Data handling processes aligned to GDPR principles for EU client data.

**HIPAA-Aligned Processes**

Controls aligned to HIPAA expectations for protected health information.

**ISO-Aligned Processes**

Operations structured against ISO-aligned quality and security practice.

**Confidentiality Agreements**

NDAs executed at company and individual staff level, every engagement.

**Secure Infrastructure**

Hardened, monitored production environments with restricted egress.

**Role-Based Access**

Access rights scoped strictly to project role and business need.

**Encrypted Transfers**

Data in transit protected via encrypted transfer protocols.

**Secure File Storage**

Segregated, access-logged storage for client data at rest.

**Controlled Access**

Physical and system access controlled and continuously logged.

**Client Data Confidentiality**

Confidentiality obligations enforced through audit and training.

— TECHNOLOGY & PLATFORMS

Platform-Agnostic, Enterprise-Ready

We operate inside the tools our clients already use — or stand up a dedicated instance — so integration never becomes a blocker to production.

Annotation & ML Tooling

 CVAT ANNOTATION	 Label Studio ANNOTATION	 Labelbox ANNOTATION	 SuperAnnotate ANNOTATION
 Supervisely ANNOTATION	 V7 ANNOTATION	 Roboflow ANNOTATION	 SageMaker Ground Truth ML / AWS

Enterprise & Productivity Systems

 Microsoft Office PRODUCTIVITY	 Google Workspace PRODUCTIVITY	 OCR Platforms DATA CAPTURE	 Cloud Platforms INFRASTRUCTURE
 Custom Client Systems INTEGRATION	 ERP Systems ENTERPRISE	 CRM Systems ENTERPRISE	

Tool-agnostic by design. Platform selection is driven by the client's existing stack and project requirements — not by internal preference — with teams trained across every environment listed above.

— WHY CHOOSE US

Built to Be a Long-Term Delivery Partner

Procurement teams choose Precise BPO Solution not for a single project, but for a delivery model that keeps working as volume, complexity and regulatory scrutiny increase.

16+

YEARS IN CONTINUOUS OPERATION

500+

FULL-TIME DELIVERY PROFESSIONALS

18

INDUSTRY VERTICALS SERVED

01

ACCOUNTABLE POINT OF CONTACT

Since 2008

Sixteen-plus years of continuous delivery experience across regulated and high-volume industries.

500+ Professionals

A trained, full-time workforce — not a rotating freelance pool — assigned to production floors.

Flexible Team Structures

Teams sized and skilled to the engagement, from pilot volumes to enterprise scale.

Enterprise-Grade Delivery

The same governance, QA and security framework applied regardless of project size.

Fast, Predictable Turnaround

Committed SLAs backed by pilot-tested throughput and capacity planning.

Cost-Effective Operations

Enterprise quality delivered at an outsourced cost structure.

Dedicated Project Managers

A single accountable owner for communication, reporting and escalation.

Customized Workflows

SOPs built around each client's taxonomy, tools and compliance requirements.

Scalable Operations

Capacity that expands and contracts with client demand, without re-negotiation cycles.

Global Client Base

Delivery experience spanning multiple regions, sectors and regulatory regimes.

Long-Term Partnerships

Client relationships measured in years, not project cycles.

— ENGAGEMENT MODELS

Six Ways to Structure the Partnership

Every engagement model rests on the same delivery, quality and security foundation — the structure simply changes how capacity is committed and billed.

— GLOBAL DELIVERY

A Delivery Footprint Built for Global Programs

Regional delivery capability across six geographies, coordinated through one governance model and one point of accountability.

✓ **Reliable Delivery**

Consistent throughput and quality regardless of time zone or region.

💬 **Transparent Communication**

Structured reporting cadence and direct access to delivery leadership.

🔗 **Scalable Teams**

Capacity that mobilizes quickly as regional demand shifts.

🛡️ **Enterprise Processes**

The same governance framework applied across every delivery region.

🔄 **Long-Term Partnerships**

Regional relationships built for multi-year continuity.
