

AI DATA SERVICES

AI Data Labeling & Annotation Services

High-quality training data for Computer Vision, NLP, Generative AI and Machine Learning — produced by dedicated annotation teams under a multi-level QA framework.

- Since 2008
- 500+ Professionals
- ISO-Aligned Processes
- GDPR Compliant Workflows
- HIPAA-Aligned
- Trusted Global Delivery

A dedicated AI data services partner for training-data at production scale.

Precise BPO Solution has delivered enterprise data operations since 2008. Today, that same production discipline powers our AI Data Labeling & Annotation practice — dedicated teams, structured QA, and secure infrastructure built to turn raw data into model-ready training sets at scale.

**Since 2008**

17+ years of production BPO experience

**500+ Skilled Professionals**

Trained annotation & QA specialists

**Millions of Assets Annotated**

Images, video, text and audio at scale

**Enterprise Delivery Model**

Defined SOPs, SLAs and reporting

**Dedicated QA Teams**

Independent, multi-level review layers

**Global Customers**

AI, automotive, healthcare & retail clients

**Secure Infrastructure**

Access-controlled, encrypted environments

**Scalable Production Teams**

Flex capacity up or down with volume

OUR JOURNEY

Complete annotation coverage — every modality, every use case.

COMPUTER VISION

 Bounding Box Annotation Polygon Annotation Semantic Segmentation Instance Segmentation Image Classification Multi-label Classification Object Detection Object Tracking

VIDEO & MOTION

 Video Annotation Keypoint Annotation Pose Estimation Facial Landmark Annotation

3D & SPATIAL

 3D Cuboid Annotation LiDAR Annotation Point Cloud Annotation

TEXT & NLP

 OCR Annotation Text Annotation Named Entity Recognition Intent Classification Sentiment Annotation

AUDIO & SPEECH

 Audio Annotation Speech Transcription Speaker Diarization

INDUSTRY-SPECIFIC ANNOTATION

 Medical Image Annotation Satellite Image Annotation Agriculture Annotation Retail Annotation Manufacturing Annotation Autonomous Driving Annotation

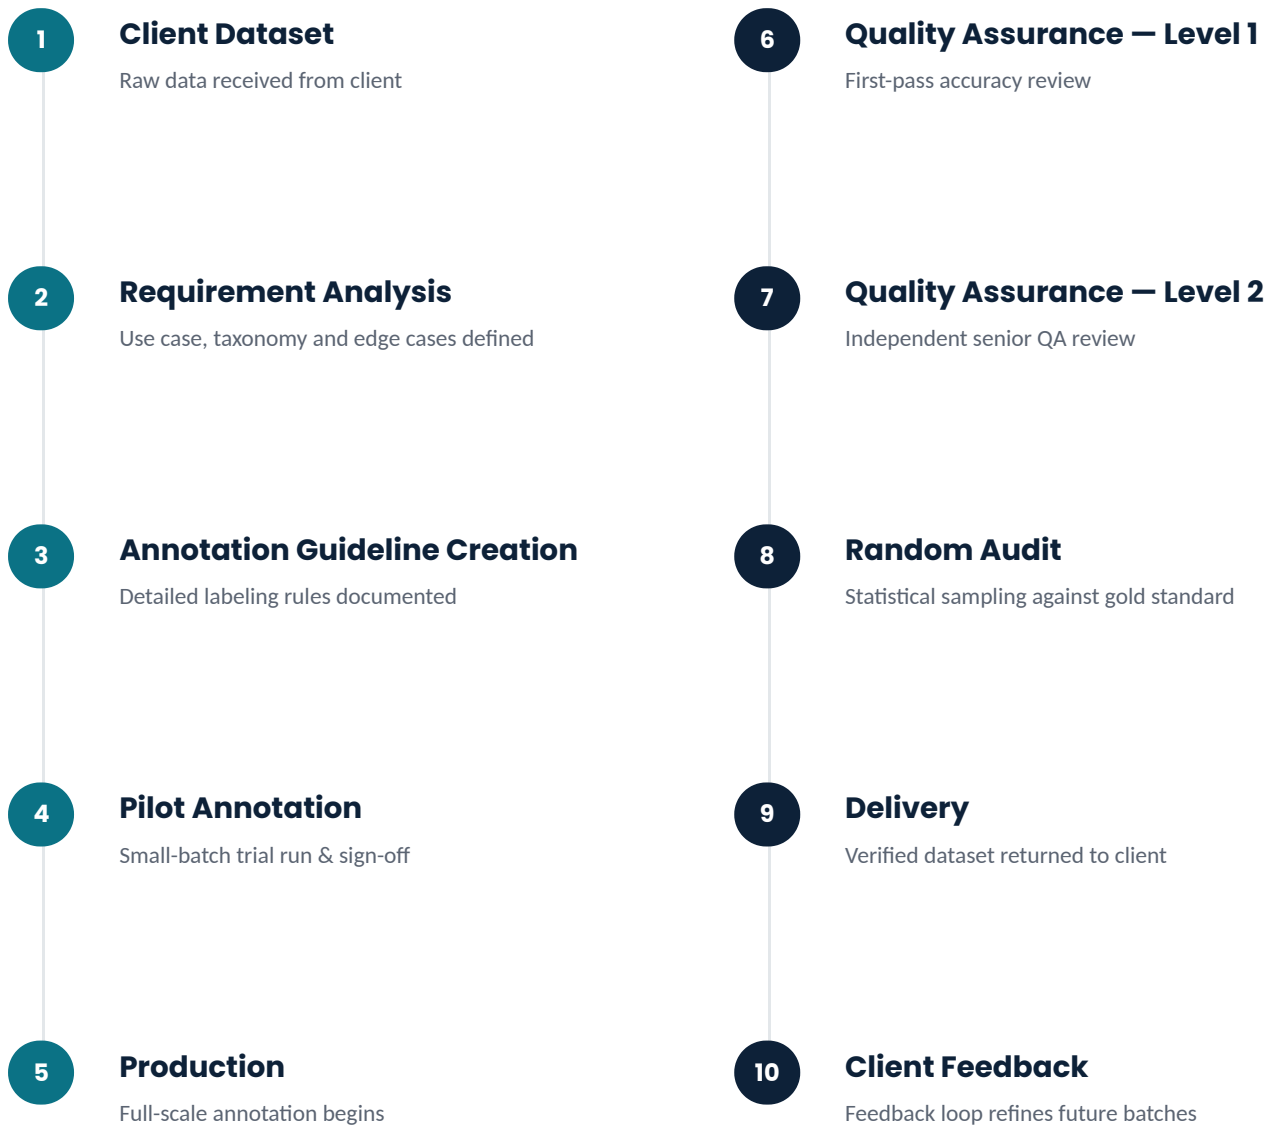

Training data for AI across every major industry vertical.

Our annotation teams are cross-trained across domain-specific data types — from clinical imagery to satellite feeds — so every dataset meets the accuracy bar its industry demands.

Domain-trained annotators, industry-specific guidelines, and QA calibrated to each vertical's accuracy requirements.

From raw dataset to model-ready training data, in ten checkpoints.

● **Defined SLAs**● **Documented Guidelines**● **Iterative Feedback Loop**● **Full Traceability**

A multi-layered QA framework built for training-data accuracy.

**99%+**

Accuracy Goal

**Multi-Level**

QA Framework

01

Double Blind Annotation

Two annotators label independently

02

Consensus Review

Discrepancies reconciled before sign-off

03

Senior QA Validation

Experienced reviewer spot-checks output

04

Random Sampling

Statistical batch-level sampling

05

Accuracy Measurement

IoU, precision & recall scoring

06

Gold Standard Comparison

Benchmarked against reference sets

07

Error Reports

Root-cause analysis on flagged items

08

Continuous Improvement

Guidelines refined every cycle

Fluent across the annotation tooling ecosystem.

Our teams work directly inside the platform you already use — or inside a custom-built annotation environment configured to your schema and QA rules.

Raw Data

Your Platform
or Ours

Trained
Annotators

QA-Verified
Dataset

Enterprise-grade security for sensitive training data.

Client datasets are handled under strict access control, encryption and confidentiality protocols — from ingestion through final delivery.

Secure NDA Processes

Signed confidentiality at every engagement

GDPR-Compliant Workflows

Data handling aligned to GDPR principles

ISO-Aligned Processes

Structured, auditable operating standards

Encrypted Storage

Data encrypted at rest and in transit

Role-Based Access

Least-privilege access by function

HIPAA-Aligned Processes

Safeguards for protected health data

Secure File Transfer

Encrypted, access-controlled handoff

Confidential Workforce

Vetted annotators under strict data policy

COMPLIANCE POSTURE

● ISO-Aligned

● GDPR-Aligned

● HIPAA-Aligned

● Role-Based Access

● NDA-Protected

Built for enterprises that can't afford bad training data.

01

500+ Professionals

A deep bench of trained annotation specialists.

02

Since 2008

17+ years of enterprise production discipline.

03

Fast Turnaround

Parallel production teams keep cycles short.

04

Dedicated Teams

Your own annotation unit, not a shared pool.

05

Flexible Scaling

Capacity flexes with your dataset volume.

06

Competitive Pricing

Enterprise quality at a lower operational cost.

07

Enterprise Quality

Multi-level QA built into every engagement.

08

Global Delivery

Structured to support clients across time zones.

09

Customized Workflows

Guidelines and tooling matched to your schema.

10

Experienced Project Managers

Single point of accountability end-to-end.

"The same production discipline that powers our BPO operations — applied to AI training data."

Let's Build Better AI Together

From pilot batches to millions of annotated assets — our teams are ready to become the data engine behind your next model.
