

HIGH-VOLUME DATA ENTRY & DOCUMENT
PROCESSING

High-volume accuracy. Fraction of the cost.

Structured teams and defined process, at up to 50–60% lower operational cost than in-house or Western BPO teams — dedicated back-office production for global enterprises since 2008.

HIGH-VOLUME
DELIVERY

50–60%

LOWER OPERATIONAL
COST

Built to carry the document-intensive workload that slows internal teams down.

Since 2008, Precise BPO Solution has built dedicated production units that handle high-volume data entry, document processing and back-office operations for enterprises across regulated and high-growth industries alike. Every engagement runs on a defined delivery model — trained teams, multi-level quality checks and predictable turnaround — so outsourced work meets the standard clients expect from an internal department, at a lower operational cost.

DELIVERY TEAMS

- Dedicated production teams per account, not a shared pool
- Multi-level quality checks built into every engagement
- Predictable turnaround across high-volume production cycles
- Lower operational cost than scaling an internal department

"Structured teams, defined process, measurable accuracy — at enterprise volume."

Built for enterprise-scale accuracy.

01

17+ Years of BPO Delivery

Nearly two decades of dedicated production experience across regulated industries.

02

500+ Trained Professionals

A deep bench of data processing specialists trained to production standard.

03

Dedicated Production Teams

Every account is staffed with its own team, not a shared resourcing pool.

04

Multi-Level Quality Assurance

Layered review framework designed to catch errors before delivery.

05

Scalable, High-Volume Operations

Production capacity structured to flex with client volume, up or down.

06

Competitive, Transparent Pricing

Clear engagement models with no hidden costs across the delivery cycle.

07

Fast, Predictable Turnaround

Parallel processing across trained teams keeps delivery cycles short.

08

Global Delivery Capability

Offshore teams structured to support clients across time zones.

COMPLIANCE & SECURITY POSTURE

● ISO-Aligned

● GDPR-Aligned

● HIPAA-Aligned

● Role-Based Access

End-to-end data & document processing.

General Data Entry

Online, offline, remote, bulk and high-volume data entry across structured and unstructured source formats.

Document Processing

Indexing, digitization, OCR verification and correction, document management, conversion, PDF data extraction and invoice processing.

Forms Processing

Survey, feedback, rebate, questionnaire, application, registration, claim, healthcare, insurance, tax and government forms.

Order Processing

Sales and purchase order processing, order entry, management and verification for high-volume transaction flows.

Ecommerce

Product data entry, catalog management and enrichment, marketplace listing, and price and inventory updates.

Continued on the following page — Financial, Insurance, Healthcare, Legal & General Support.

Specialized processing for regulated industries.

Financial

Invoice, AP/AR, bank statement, receipt, voucher and mortgage data entry, processed to audit-ready standard.

Insurance

Claims processing support, policy data entry, insurance forms and medical claims handling.

Healthcare

Medical data entry, claims processing, healthcare records and EMR data entry under HIPAA-aligned handling.

Legal

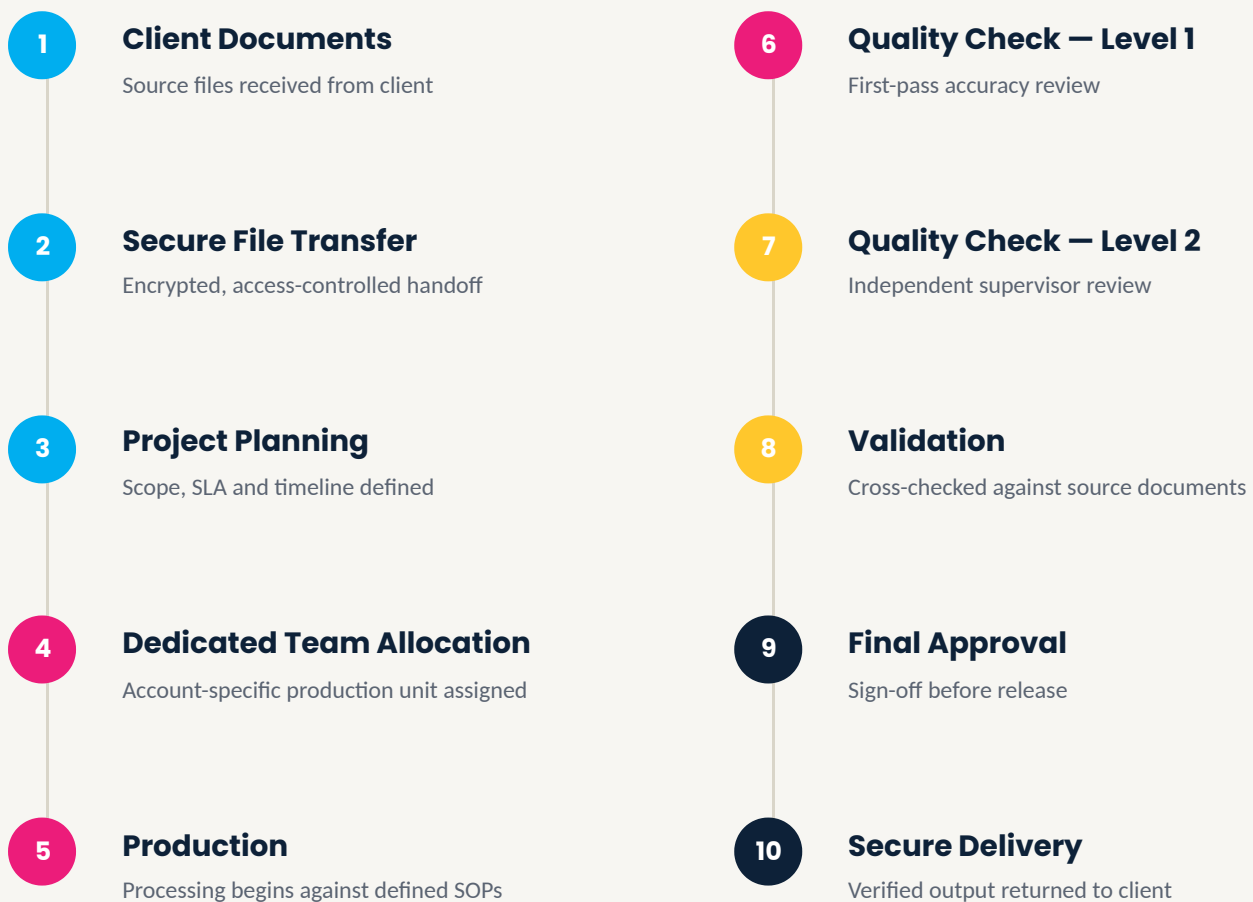

Legal document indexing, court record data entry and litigation support processing.

General Support

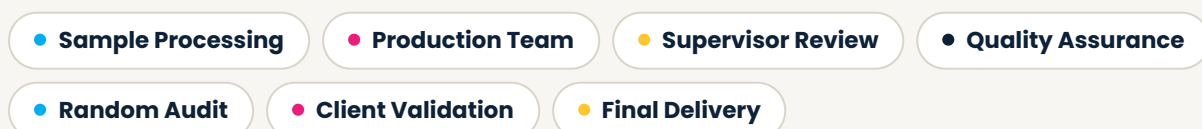

Spreadsheet processing, database updating, CRM data entry, data cleansing, validation, enrichment, standardization, conversion and back-office support.

From client documents to secure delivery, in ten checkpoints.

QUALITY CONTROL FRAMEWORK

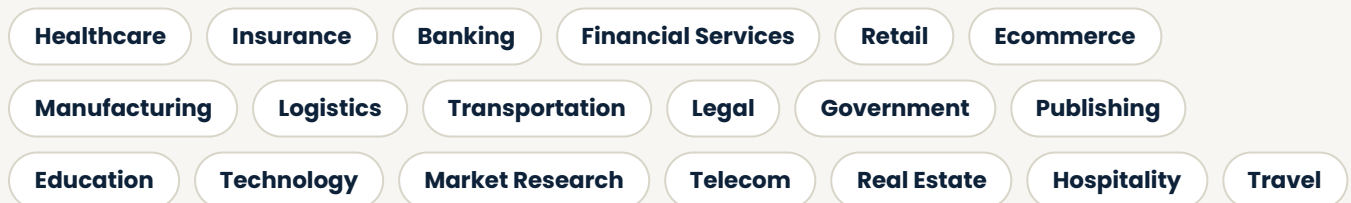

Security posture built for regulated data.

- Secure file transfer
- Role-based access
- HIPAA-aligned processes
- Continuous quality monitoring
- Data confidentiality
- GDPR-aligned workflows
- Enterprise-grade security
- Secure, verified delivery

INDUSTRIES WE SERVE

COST-EFFECTIVE, HIGH-VOLUME DELIVERY

Lower Operational Cost

Offshore delivery reduces overhead versus scaling an internal team.

Flexible Team Scaling

Dedicated resources flex up or down with your production volume.

Faster Turnaround

Parallel processing across trained teams shortens delivery cycles.

Need a reliable data entry partner?

Whether you need ongoing production support, dedicated offshore teams, large-scale document processing, form processing, indexing services, invoice processing, or custom back-office operations — our delivery teams are structured to support it.
